

LEGO® Workshop at the SEE Science Center

Space

Monday February 13th 2012

12:30pm - 2:30pm or 3:45pm-5:45pm

Ages 6 to 10

Build Satellites, space Craft, and fictional space ships. Learn the difference between theatrical space movies and tv shows and the reality of space. We will discuss: Are wings necessary in space? Are there big fiery explosions in space? Why or why not? Does it matter which part of the space craft is "up" in space? Plus much more. Students are encouraged to build creatively and are guided through the problem solving process in a fun and hands-on way.

The cost is \$28 per child (\$25 for SEE members)

Each session is limited to 20 participants.

This Mini-Course was created by and will be run by Brickapalooza. The course instructor Eric Kingsley, is an adult LEGO fan, he has been a LEGO Ambassador and currently works on fan created content for LEGO Universe. He also helped plan and build SEE's LEGO Millyard Project.

Mail the portion below to: SEE Science Center, 200 Bedford Street, Manchester, NH 03101
or fax the form to 669-0400 or Call 669-0400 to register by phone.
