One Week Only

Movie Making Camp

Using Stop-motion Animation & LEGO® Bricks & Minifigures

July 29 to August 2, 2019

Ages 8 to 12 9:30 am - 2:00 pm

Campers complete an "Invention and Discovery" film using LEGO® bricks and minifigures. Working in groups of 3-4 campers begin by discovering the techniques of stop-motion animation and film making while they brainstorm and choose a film subject. They then work on story boarding, set design and construction and mini-figure casting. The final 3 days are for filming, sound recording and editing.

During filming, each student will get to sit as the director, computer operator, and movement coordinator and work with sound effects.. Campers will also have the opportunity to create an intro and final credits. A film premiere concludes the camp. Afterward, movies will be posted to YouTube for students to share with family and friends and copies are provided to campers.

On average each group creates about three minutes of film using a 10-15 frame per second playback rate. Visit the SEE Science Center's YouTube page to watch films from previous camps.

The cost is $ 275 per child ($250 for SEE members)
The course is limited to 12 participants.

This Mini-Course was created by and will be run by Brickapalooza owner and founder Eric Kingsley, an adult LEGO fan, who also helped plan and build SEE's LEGO Millyard Project.

Mail the portion below to: SEE Science Center, 200 Bedford Street, Manchester, NH 03101
or Call 669-0400 to register by phone.
